

# Smart Window Insert

Powered by **DynamicTint™**

The world's first window insert that dynamically adjusts the visible light transmission of a window.

Easily and affordably reduce your building's carbon emissions by enhancing your existing windows with Smart Window Inserts. No window replacements required.

## Features

- Quick installation, no fasteners required
- Battery powered with solar charging system
- Simple one touch activation
- Transition from clear to dark in seconds
- Retrofit existing windows
- Monolithic; thin and light weight

## Benefits

- Reduce heating and cooling costs
- Reduce building's carbon emissions
- Reduce glare
- Improve tenant comfort
- Reduce outside noise

## Security

- Fully encrypted communication between window insert and controller
- Fully encrypted transmission of data from window insert to the cloud
- Tamper resistant

## Monitoring

- 24/7 device health maintenance
- Solar energy consumption
- Internal and external temperature
- Help when you need it, from real people

## Specifications

Frame Color	Made to match
Cloud-based Monitoring	24h monitoring
Wireless Connected System	Yes
Remote Touch to Transition	Yes
Weight Per Square Foot	< 2.0 lbs
Native State	Dark
Transition Time	<4 seconds
Battery Powered	Yes
OTA Updates	Yes
Visible Light Transmission	Clear state up to 70%
Visible Light Transmission	Dark state up to 4%
Cloud Management	Yes
